ABOUT

INTERNATIONAL CONFERENCE AND EXHIBITION FOR TECHNOLOGIES, MATERIALS, STANDARDS AND EQUIPMENT IN THE MICROELECTRONICS INDUSTRY

SEMIEXPO Russia unites the international specialized exhibition with an extensive business program, where executives and top managers of the largest microelectronic companies, representatives of government authorities, research institutes and international associations participate.

A rich business program, including forums, conferences, panel discussions and technological tours, will present the most current information about the microelectronics and semiconductors market to participants and visitors.

It is the most important annual event for the micro- and radio-electronics industry in Russia and CIS and deals with technologies that are used in the development and manufacture of semiconductors, micro and nano electronics product applications.

SEMIEXPO Russia provides an excellent opportunity to reach the main producers and businesses along the semiconductor value chain and to expand into the Russian market. It brings together the participating companies with decision makers and professionals from the industry and deals with the current challenges and trends.

WHY SEMIEXPO RUSSIA?

EXPLORE

competitive market analysis, marketing and research news programs, C-level visitors

COLLABORATE

strategic initiatives, international microelectronics industry committee

CONNECT

strategic partners, government contracts, new distribution channels development, new customers and suppliers

INNOVATE

emerging technologies, international projects, local competences

EXHIBITOR & VISITOR PROFILE

EXHIBITOR PROFILE

SEMIEXPO Russia annually enlarges thematic areas and increases the presence of highly-interested exhibitors from the following industrial fields:

Manufacturers and suppliers of the process equipment

Materials suppliers

Manufacturers of semiconductors and electronic component base

Developers of microcircuits

Developers and manufacturers of the electronic equipment

Research institutes

Engineering companies

Governmental organizations

Higher educational institutions

Financial and investment organizations, development institutions

Professional associations

SEMIEXPO Russia 2019 key facts & figures:

OUR EXHIBITORS 2019: KBTEM-OMO, GLOBALFOUNDRIES, CS CLEAN SOLUTIONS AG, SPEEDFAM, DIPAUL, SVCS PROCESS INNOVATION, ESTO, CROCUS NANO ELECTRONICS, EUROINTECH, PICOSUN, MAICOM QUARZ, PTW EUROPA and many more...

Over
50
exhibitors

Exhibitors from
12
countries

Over
1600
professional
visitors

98%
Exhibitors assess
positively the results
of participation in the
exhibition

VISITOR PROFILE

SEMIEXPO Russia is annually visited by executives and specialists from the following industries:

Mechanical engineering	Robotics	Telecommunications
Automotive industry	Smart city infrastructure	Security systems and IT
Aerospace & defense	Medical and healthcare	LED, MEMS
Shipbuilding industry	Logistics and transportation	Consumer electronics
Power engineering	Testing and control	Digital technologies and solutions

NEW THEMATIC AREAS TO GROW YOUR BUSINESS:

Big data

Neural technologies

Quantum technologies

VR, AR

IT

Robotics components

Sensorics

Wireless communications

CAD

SEMIEXPO Russia is more than exhibition. Explore our programs 2020 and join our business programme:

SEMIEXPO Market Update – monthly industry review, which includes articles, interviews, news from key Russian and international companies;

Pitch deck session and contest “Innovative Electronics” with the selected electronics, machinery and IT start-ups;

Match-making opportunities for business meetings with Russian executives and experts;

Annual SEMI Member Forum;

International MEMS Forum;

Annual talent day and Career Café;

International development programs for startups’ and HR in semiconductor and electronics industries.

Discover the full range of technologies and equipment

Participate in our forums and technological tours

Combine global voice of the industry and local competence

Make new clients and partners

Stay ahead of the market with our regular reports, market update and news

Explore emerging markets and changes in the Russian microelectronics market
